

SecuriX Simultan
25.400 dpi

The high-definition DMD chip with 4° technology for perfect edge sharpness and long-lasting lasers exposes each pixel up to 800 times for even and optimal cross-linking of the emulsion.

The SecuriX digital imaging system offers the following highlights

- Resolution of 5,080, 12,700 and 25,400 dpi
- High-quality special optics
- 375 nm and 405 nm other wavelengths available upon request
- Powerful Japanese laser
- Automatic autofocus for optimal depth of field
- Vacuum plate for mounting of rotary screens and printing plates
- Support for flat screens
- Machine accuracy of 1 micron
- Marble machine bed

DROP Trading AG - Switzerland, was founded in 2006 by Hans Lüscher, the former owner of Lüscher AG - Switzerland.

We see ourselves as an innovative partner in the area of prepress for the printing industry.

DROP offers the latest digital exposure technologies for various printing processes.

by HANS LÜSCHER.
